Rural Electrification below the target

4068. SHRI SANTOSH BAGRODIA : Will the Minister of POWER be pleased to state :

(a) whether it is a fact that the Rural Electrification in the country is much below the target;

(b) if so, the reasons for the same, State-wise;

(c) how many villages in the country were provided with electricity in the last three years, State-wise; and

(d) what measures are being taken for accelerating the process in the year 2000-2001?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (SHRIMATI JAYAWANTI MEHTA) : (a) and (b) Out of a total of 587258 inhabited villages as per 1991 census, 506401 villages have been electrified at the end of February, 2000. Many of the villages remaining for electrification are generally in remote and difficult areas. Some of the major reasons for slow progress are attributable mainly to financial constraints, inadequate sub-distribution system facilities, disturbed conditions prevailing in some States, non-repayment of dues of Rural Electrification Corporation resulting in no cash flow, lack of demand from the consumers due to backwardness and poor economic conditions.

(c) and (d) Details villages electrified in the first three years of the 9th Plan are given in the statement (*See* below). Many of the villages remaining for

electrification are generally in remote and difficult areas. Ministry of Finance has proposed to release funds for rural electrification directly to the State which were earlier being routed through Rural Electrification Corporation (REC) . Further, to give boost to electrification programme in tribal villages and dalit bastis and other weaker sections, Government of India has recently decided to grant interest subsidy of Rs. 16.67 crores for electrification of 415 trible villages and 2440 dalit bastis during the year 2000-2001. Government has also decided to set up a group of Ministers (GOM) to review the existing schemes relating to electrification of tribal villages, dalit bastis and benefitting other weaker sections and suggest modifications for accelerating the place of electrification so that they enjoy the benefit of electrification to the same extent as other areas/ sections of the population.

STATEMENT

Year-wise and State-wise Progress of Village Electrification During First Three Years of IX Five Year Plan (1991 Census)
